

# Cornerstone™ Core Software Feature Comparison

Features	Base Station	Field Station	Configurator	Cal Station
Main window - event log, security	■	■	■	■
Direct HART instrument connection and configuration	■	■	■	
Detailed configuration via ModLibs	■	■	■	
HART instrument records	■	■	■	generic only
Conventional instrument records	■	■		■
Calibrator records	■	■		■
Calibration schemes (procedure records)	■	■		■
Tag note records	■	read only		■
Configuration history records	■	■		■
Calibration history records	■	■		■
Maintenance service note records	■	■		■
Manual calibration	■	■	■	■
Multi-point test/calibration	■	■		■
Automated calibration via CalLibs	■	■		
Portable calibrator procedure download	■			■
Portable calibrator results upload	■			■
Configuration reports	■		■	■
Calibration reports	■			■
Calibration schedules	■			■
Configuration data import	■			■
Configuration data export	■		■	■
Calibration data import	manual			■
Calibration data export	■			■
Upload Config data to Base Station		■	■	
Upload Cal History to Base Station		■		
Download database from Base Station		■		
On-line Diagrams	■	■		■
On-line maintenance via ComLibs	■		■	
Instrument Status Monitor option	■		■	
Read/Write HART process variable data via DDE	■	■	■	
Graphical HART pv monitor	■	■		
Multi-user (LAN) network option	■			■
Migration path to more capable Cornerstone software	Multi-user Kit (LAN)	not applicable	Base Station	Cal Station Multi-user Kit (LAN)
